

COMPLETE FEMALE DISPERSAL

WEDNESDAY 24TH SEPTEMBER 2025

A LIFETIME OF GENETICS ON OFFER

SALE INFORMATION

WEDNESDAY 24TH SEPTEMBER 2025

INSPECTIONS - 9AM
SALE COMMENCING -12PM

PRESALE INSPECTION DAY

TUESDAY 23RD SEPTEMBER | FROM 2PM

Please join us the afternoon before the sale for drinks and nibbles at the sale shed from 5pm!

.....
Earlier inspections welcome at anytime, by appointment.

RAYLEIGH

POLL HEREFORDS

EST. 1957

COMPLETE FEMALE DISPERSAL

Offering:

- **90 PTIC cows with calves at foot**
- **10 Unjoined cows with calves at foot**
 - **48 PTIC heifers**
 - **4 stud sires**
 - **24 Semen lots**

Jeff, Robyn and Anna Holcombe

“Kombali”

640 Kaputar Road, Narrabri NSW 2390

Jeff: 0427 285 226 • Robyn: 0428 285 226 • Anna: 0429 694 435

Email: rayleigh8@bigpond.com • www.rayleighpollherefords.com.au

Selling Agent: Bruce Evans - Nutrien Phone: 0428 921 599

Stud Stock Agent: John Settree - Nutrien Phone: 0408 297 368

SALE INFORMATION

The Sale venue is located at **“Kombali” 640 Kaputar Road Narrabri NSW 2390**, which is approximately 7km from the centre of Narrabri.

- All cattle will be available for Pre-sale inspection from 2pm on the 23rd September 2025 and again from 9am on Sale Day 24th September 2025 with the auction to commence at 12pm sharp. Prior inspections can be arranged by appointment with the vendor or selling agents.
- Sale will be conducted using the Open Cry Auction system, with online bidding available through Auctions Plus. Cattle will be presented for auction via video.
- GST is to be added onto the purchase price at the fall of the auctioneer’s hammer. You will be invoiced purchase price plus GST.
- Rebate of 2% will be offered to outside Agents introducing buyers in writing 24 hours prior to the Sale and attending the sale with the client.
- A Buyer’s Instruction Slip must be completed by the Purchaser or representative and handed to the Auctioneer prior to leaving the sale. No verbal instructions will be accepted.
- There is no vendor insurance on sale cattle. It will be the responsibility of the buyer to insure their purchases. Insurance representatives will be in attendance at the sale and can offer insurance terms on sale cattle.
- Dick Smith Transport will be available to co-ordinate deliveries, with local carriers available for local deliveries. All care will be taken of the cattle prior to delivery however no responsibility will be accepted and insurance is recommended.
- All cows have been 7 in 1 and Dectomax vaccinated in June 2025 and Pestiguard vaccinated in September 2024. Calves have had their first 7 in 1 vaccinated in August 2025 and have been Identification Tattooed. All cows will be Pregnancy tested prior to Sale.
- Calves have been Poll Gene tested and Parent Verified.
- Visitors enter the cattle pens at their own risk. Children and prams must not enter the yards.
- Accommodation can be arranged by contacting the selling agents.
- Food and refreshments will be served on Sale Day.
- Rayleigh Poll Herefords have a Biosecurity plan with a JBAS – 7.
- Whilst all due care and attention has been paid to the accuracy in the compilation of this catalogue, neither the vendor nor the selling agents or representatives therefore assume any responsibility whatsoever for the correctness, use or interpretation of the information on animals include in this catalogue. Potential buyers are advised to inspect animals prior to sale.

~A NOTE FROM THE HOLCOMBE FAMILY~

It's hard to put into words what it means to write this letter.

After 68 years of breeding, selection and dedication, we're preparing to part with something that's been at the heart of our family for three generations - the complete dispersal of the Rayleigh Poll Hereford female herd.

This moment carries a deep mix of emotion and pride. Rayleigh Poll Herefords began in 1957 with a simple goal: to breed functional, efficient and profitable cattle that could perform under real-world conditions. Since then, countless cows have walked our paddocks, each one part of decades of learning, improvement and legacy.

This dispersal represents the full strength of nearly seven decades of breeding and careful selection for fertility, structure, feed efficiency and carcase quality. 104 registered cows and 48 heifers have been catalogued, drawn from our most proven lines and ready to contribute meaningfully to herds across the country.

We have always believed that the strength of any breeding program lies in the female herd on which it is based. Letting go isn't easy, but we're proud to pass these females on, while our stud is in its prime. We hope they bring as much value and satisfaction to their new owners as they have to us.

While this sale marks a major milestone for our family, it isn't goodbye quite yet. We will be holding our final bull sale next year in July. With a strong line up of bulls, that will again be placed under the same heavy selection pressures as those before them. They are a line up we are very proud to present as the last for Rayleigh Poll Herefords.

We're incredibly proud of what we've built with Rayleigh, but we're equally as proud to see the next generation continuing to push boundaries in their own way. Our daughter Sarah and son-in-law Sam are paving their own path as Jarrah Genetics, making their mark in the Hereford breed as well as the wider beef industry. Their passion, drive, and integrity give us great confidence in the future of the industry. And for those who might be missing us too much down the track— well, you'll know where to find some top-quality Hereford bulls!

To everyone who's supported us over the years, thank you. Your trust and encouragement have meant more than we can say. The friendships we've built, often forged over a handshake at a sale or a good yarn on the phone, have been one of the most meaningful parts of this journey. These are the moments we will always cherish.

We look forward to seeing you at the dispersal sale, and again for one last bull sale in 2026. It's been an extraordinary ride, thank you for being part of it.

Warm Regards,
The Holcombe Family
Rayleigh Poll Herefords

AuctionsPlus

How to Register and Bid on AuctionsPlus

1

Go to **www.auctionsplus.com.au** to register at least 48 hours before the sale.

2

Select "**Sign Up**" in the top right hand corner.

3

Fill out your name, mobile number, email address and create a password.

4

Go to your emails and confirm the account.

5

Return to AuctionsPlus and log in.

6

Select "**Dashboard**" and then select "**Request Approval to Buy**".

7

Fill in buyer details and once completed go back to Dashboard.

8

Complete buyer induction module (approx. 30 minutes).

9

AuctionsPlus will email you to let you know that your account has been approved.

10

Log in on sale day and connect to auction.

11

Bid using the two-step process – unlock the bid button and bid at that price.

12

If you are successful, the selling agent will contact you post sale to organise delivery and payment.

For more information please contact us on:

Phone: (02) 9262 4222

Email: info@auctionsplus.com.au

BREEDPLAN MADE EASY

Breedplan is a performance evaluation program that compares bulls “on a level playing field” for a number of important commercial traits.

The difference between a bull's genetics and the breed benchmark for a range of traits is reported as an **Estimated Breeding Value (EBV)** - an estimate of how a bull will perform as a parent rather than how he looks on the day.

EBVs can be positive (+) or negative (-), ie, above or below the breed benchmark of zero.

EBVs are calculated from the available performance information on the animal, its parents, progeny and its close relatives within the breed.

The information is adjusted for age, dam age, and for differences between herds, years, season of calving, management effects and for mating and selection biases. The heritability of the trait is also taken into account.

EBVs - what do they tell me about a bull

BIRTH

Birth Weight: The Birth Weight EBV (kg) is based on the measured birth weight of animals, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

FERTILITY

Scrotal Size: The Scrotal Size EBV (cm) is an indicator of male fertility. Higher (positive) EBVs indicate higher fertility. Higher SS EBVs are also positively associated with female fertility through earlier age of puberty.

GROWTH

Milk: 200-Day Milk EBV (kg) is an estimate of the contribution that a dam makes to the 200 day weight of her progeny. For sires, this is an indication of the contribution that his daughters will make to the 200 day weight of their calves.

200-Day Growth: The 200-Day EBV (kg) is calculated from the weight of animals taken between 80 and 300 days of age. Values are adjusted to 200 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth to early ages (ie. 8-10 months).

400-Day Weight: The 400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600-Day Weight: The 600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

CARCASE

Eye Muscle Area: The EMA EBV (cm²) estimates genetic differences in eye muscle area at the 12/13th rib site of a 300kg dressed carcass. More positive EBVs indicate better muscling on animals.

Rib Fat: The Rib Fat EBV (mm) estimates the genetic differences in fat depth at the 12/13th rib in a 300kg dressed carcass. More positive EBVs indicate more subcutaneous fat and earlier maturity.

Rump Fat: The Rump Fat EBV (mm) estimates the genetic differences in fat depth at the P8 site of a 300kg dressed carcass. More positive EBVs indicate more subcutaneous fat and earlier maturity.

Intramuscular Fat Percent: The IMF% EBV (%) is an estimate of the genetic difference in the percentage of intra-muscular fat at the 12/13th rib site in a 300kg carcass. More positive EBVs indicate higher marbling.

The Group Breedplan Estimated Breeding Values contained in this catalogue were supplied by the Agricultural Business Research Institute from data supplied by the breeders. Neither Herefords Australia Limited nor the ABRI oversee or audit the collection of this data. Log on to www.herefordsaustralia.com.au for a full description and explanation of all Breedplan, EBVs, Accuracies, Selection Indexes and Comparing Animals.

Australian Hereford Selection Indexes: Technical Specifications

Herefords Australia Ltd. currently reports two different selection indexes. These are the:

- Sustainability Production Index
- MSA Production Index

All of the selection indexes described above have been derived using [BreedObject](#) software. The BreedObject selection index development process involves four major steps. These steps are:

1. A detailed description of the input costs and value generation of the commercial herd and target production system.
2. Once the target production system is described, the BreedObject software evaluates how each trait influences profitability and the economic value of improving each trait.
3. The BreedObject software then assesses what emphasis needs to be applied to each Estimated Breeding Value (EBV) trait to achieve the maximum profitability in the production system and for the market end point for which that index was designed. This step includes evaluating the selection response expected from direct selection on the individual EBVs and the correlated responses expected from selection on related EBVs.
4. The importance placed on each EBV results in the selection index value that is calculated for each animal.

Each selection index describes a different production system/market scenario and relates to a typical commercial herd using Hereford bulls. As is the case for EBVs, each selection index can be used to rank and compare animals on their genetic merit. Producers are advised to use the selection index that most closely aligns to their production system. See the [Using Australian Hereford Selection Indexes](#) tip sheet, available in the [Help Centre](#) on the BREEDPLAN website, for further information on the identification and utilisation of the most applicable selection index for your herd.

All selection indexes are reported in units of net profitability per cow mated (\$) for the production system/market scenario they describe. Selection indexes account for both sides of the profit equation (costs as well as income), and also reflect the relative short and long term profit associated with possible selection decisions. For example, short term profit can be generated by a bull through the sale of his progeny, and the longer term profit generated by his daughters in a self-replacing cow herd.

These indexes take a balanced approach and apply selection pressure to all trait categories that impact on productivity, quality of product and cost of production. Importantly both indexes have a focus on sustainable beef production which is achieved through improving the efficiency of the production system, as well as improving eating quality. Significant premiums are applied for increasing marble score up to a marble score of 3. Pressure is also applied to early life growth to maintain low ossification scores and good MSA compliance.

In addition, each selection index targets the following specifications.

Sustainability Production Index - Estimates the genetic differences between animals in net profitability per cow joined in a commercial self-replacing Hereford herd targeting the domestic market and with a strong focus on sustainability. Daughters are retained for breeding, so maternal traits are of importance. Steers are finished on grass until 20 months of age to target 300 kg carcasses with 10 mm P8 fat depth.

MSA Production Index - Estimates the genetic differences between animals in net profitability per cow joined in a commercial self-replacing herd targeting higher MSA grades in the domestic market. Daughters are retained for breeding and so maternal traits are of importance. Steers are grain finished until 20 of age to target 340 kg carcasses with 12 mm P8 fat depth. A high cost is applied for cow feed costs during the annual feed shortage period which produces little change in mature cow weight.

More detailed information regarding each selection index is provided on the following pages.

If you have any further queries regarding the Australian Hereford Selection Indexes, please do not hesitate to contact staff at your BREEDPLAN processing centre.

BREEDPLAN results are calculated by the Agricultural Business Research Institute using beef genetic evaluation analytical software developed by AGBU and Meat & Livestock Australia Limited.
