

RAYLEIGH

POLL HEREFORDS

EST. 1957

16TH ANNUAL BULL SALE

FRIDAY 11TH JULY 2025

INSPECTIONS 10AM | SALE 1PM

COMPLETE FEMALE DISPERSAL SALE

WEDNESDAY 24TH SEPTEMBER 2025

OFFERING;

112 JOINED COWS WITH CALVES AT FOOT

45 JOINED HEIFERS

A lifetime of breeding experience on offer. Secure generations of functional, efficient, and profitable genetics.

~A NOTE FROM THE HOLCOMBE FAMILY~

Dearest clients and friends,

As we prepare for this year's Bull Sale, our 68th year breeding performance-driven, pasture-proven bulls, we find ourselves reflecting on what has been one of our greatest lifelong joys: breeding Poll Hereford cattle that stand the test of time.

Rayleigh Poll Herefords began in 1957 with a vision to breed functional, efficient, and reliable cattle that could perform in real-world conditions. It's been a privilege to see those genetics working across so many different herds and environments over the decades, delivering results where it counts, in the paddock, in the weaner pen, and in the bank account.

We're proud of the legacy Rayleigh has created, not just in the bulls we've sold, but in the trust and relationships we've built. Your support, whether recent or long-standing, has meant the world to us. This operation has never just been about cattle. It's been also about people and doing things the right way, year in and year out.

With that in mind, we want to share that this year marks the beginning of the next chapter. Our complete female dispersal will take place just a few months after this bull sale, on the 24th of September 2025. This is a significant opportunity in Australian Hereford breeding, a lifetime of selection and discipline, offered in full.

112 registered cows and 45 heifers will be catalogued, from our most proven cow lines, and all with the type, fertility, and doing ability Rayleigh is known for.

While the final bull sale will be in 2026, this year's offering remains as strong as ever, bulls ready to work, with the predictability, soundness, and performance you've come to expect.

We sincerely thank you for the role you've played in our journey. We hope to see you at the sales and we look forward to watching Rayleigh genetics continue throughout the next generation of herds.

Warm Regards,
The Holcombe Family
Rayleigh Poll Herefords

16TH ANNUAL ON PROPERTY BULL SALE

Friday 11th July 2025

Inspections - 10am • Sale Starts - 1pm

34 Bulls

**Inspection welcome
anytime by appointment**

Jeff, Robyn and Anna Holcombe

“Kombali”

640 Kaputar Road, Narrabri NSW 2390

Jeff: 0427 285 226 • Robyn: 0428 285 226 • Anna: 0429 694 435

Email: rayleigh8@bigpond.com • www.rayleighpollherefords.com.au

Selling Agent: Bruce Evans - Nutrien Phone: 0428 921 599

Stud Stock Agent: John Settree - Nutrien Phone: 0408 297 368

SALE INFORMATION

The Sale venue is located at **"Kombali" 640 Kaputar Road Narrabri NSW 2390**, which is approximately 7km from the centre of Narrabri.

- All cattle will be available for inspection from 10am on Sale Day, with the auction to commence at 1pm sharp. Prior inspection can be arranged by contacting the vendor or selling agents.
- The Sale will be conducted using the open cry auction system, with an online bidding option available through Auctions Plus. Cattle will be presented for auction via video.
- GST is to be added onto the purchase price at the fall of the auctioneer's hammer. You will be invoiced purchase price plus GST.
- Rebate of 2% will be offered to outside Agents introducing buyers in writing 24 hours prior to the Sale and attending the sale with the client.
- Free delivery is available up to 200kms. Delivery can be given at the completion of the sale and transport will be available on the day for those wishing to co-ordinate delivery.
- All care will be taken with the wellbeing of animals prior to delivery. However should unforeseen injury or illness occur, no responsibility will be accepted by the vendor. Insurance is recommended.
- A Buyer's Instruction Slip must be completed by the Purchaser or representative and handed to the Auctioneer prior to leaving the sale. No verbal instructions will be accepted.
- There is no vendor insurance on sale animals. It will be the responsibility of the buyer to insure their purchases. Insurance representatives will be in attendance on sale day.
- All bulls have been 7 in 1, Pestiguard and Vibrio vaccinated and treated with Dectomax injectable.
- All bulls have been semen, morphology and soundness tested by Narrabri Veterinary Clinic, Certificates are available on request.
- Visitors enter the cattle pens at their own risk. Children and prams must not enter the yards.
- All bulls have been DNA and SNIP tested for this year's sale. Should any additional testing be required, this will be completed upon request.
- We welcome any feedback as to how your bull is performing. This strengthens our future breeding program and ensures we continue to produce cattle suited to your needs.
- Should there be any issues with your purchases, we would like to be the first to know. All bulls come with a guarantee to naturally breed. If your bull fails to naturally breed within the first 6 month, a replacement bull or a credit (less salvage value) can be arranged. This excludes loss due to injury or illness sustained post sale day. Please contact us to discuss any issues and provide a veterinary certificate.
- Accommodation can be arranged by contacting the selling agents.
- Food and refreshments to be served on Sale Day.
- Rayleigh Poll Herefords have a Biosecurity plan with a JBAS – 7.

Disclaimer

Whilst all due care and attention has been paid to the accuracy in the compilation of this catalogue, neither the vendor nor selling agents or representatives therefore assume any responsibility whatsoever for the correctness, use or interpretation of the information on animals included in this catalogue. Potential buyers are advised to inspect animals prior to sale.

AuctionsPlus

How to Register and Bid on AuctionsPlus

1

Go to www.auctionsplus.com.au to register at least 48 hours before the sale.

2

Select **"Sign Up"** in the top right hand corner.

3

Fill out your name, mobile number, email address and create a password.

4

Go to your emails and confirm the account.

5

Return to AuctionsPlus and log in.

6

Select **"Dashboard"** and then select **"Request Approval to Buy"**.

7

Fill in buyer details and once completed go back to Dashboard.

8

Complete buyer induction module (approx. 30 minutes).

9

AuctionsPlus will email you to let you know that your account has been approved.

10

Log in on sale day and connect to auction.

11

Bid using the two-step process – unlock the bid button and bid at that price.

12

If you are successful, the selling agent will contact you post sale to organise delivery and payment.

For more information please contact us on:

Notes: Kicking off this year's bull sale with a sire that demands attention in the paddock. Ulah is an easy-doing bull with serious punch-carrying impressive depth from brisket to flank. He has a super-soft skin, a rich dark coat, and a strong head with very well-set eyes. Backed by a proven maternal line, this bull is built to breed top-quality replacement females. Top 15% 400 DW; Top 20% SS; Top 25% IMF.

Notes: A standout sire and among the best bulls ever bred at Rayleigh. Ukraine is a modern, industry-relevant bull where phenotype and genotype come together seamlessly. Exceptionally well-balanced and structurally correct, he brings serious width, depth, and muscle to the table. A true performance sire-offering excellent calving ease, low birthweight, curve-bending growth, fertility indicators, and impressive carcase traits. Ukraine comes with our highest recommendation and could be considered for heifers. Top 1% CE DIR & CE DTRS; Top 5% GL & CW; Top 10% BW, 200 DW, Rump Fat, IMF; Top 15% 600 DW & SS; Top 20% 400 DW, Milk, EMA & Rib Fat.

Notes: The first of the Injemira Techno N276 sons to be offered-and a standout since birth. Umar catches the eye with his strong muscle pattern and thick, deep hindquarter. He combines tremendous body length, depth, and structural soundness, making him a true carcase sire. Soft-skinned and with a well-set eye, Umar has consistently weighed in the top of his cohort since weaning. He's out of the great old J100 cow, who will be having her 9th calf this year. His maternal grandmother also produced 7 calves in the stud -a true testament to a productive maternal background. Top 10% Rump Fat; Top 15% EMA & Rib Fat; Top 20% Milk.

Traits Observed: BWT,200WT,400WT,600WT(x2),SS,FAT,EMA,IMF,Genomics

Notes: A super appealing, easy-doing son of Republican. Ultron is long-bodied and deep-sided, with an impressive muscle pattern and plenty of natural thickness, particularly through the twist. He has a nicely hooded eye and good lash. His dam has an excellent udder and produced nine calves for us. Ultron a low birth weight and is the kind of bull that will sire moderate, easy-to-manage progeny that hold up well in tougher conditions. Top 25% IMF.

BREEDPLAN MADE EASY

Breedplan is a performance evaluation program that compares bulls “on a level playing field” for a number of important commercial traits.

The difference between a bull’s genetics and the breed benchmark for a range of traits is reported as an **Estimated Breeding Value (EBV)** - an estimate of how a bull will perform as a parent rather than how he looks on the day.

EBVs can be positive (+) or negative (-), ie, above or below the breed benchmark of zero.

EBVs are calculated from the available performance information on the animal, its parents, progeny and its close relatives within the breed.

The information is adjusted for age, dam age, and for differences between herds, years, season of calving, management effects and for mating and selection biases. The heritability of the trait is also taken into account.

EBVs - what do they tell me about a bull

BIRTH

Birth Weight: The Birth Weight EBV (kg) is based on the measured birth weight of animals, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

FERTILITY

Scrotal Size: The Scrotal Size EBV (cm) is an indicator of male fertility. Higher (positive) EBVs indicate higher fertility. Higher SS EBVs are also positively associated with female fertility through earlier age of puberty.

GROWTH

Milk: 200-Day Milk EBV (kg) is an estimate of the contribution that a dam makes to the 200 day weight of her progeny. For sires, this is an indication of the contribution that his daughters will make to the 200 day weight of their calves.

200-Day Growth: The 200-Day EBV (kg) is calculated from the weight of animals taken between 80 and 300 days of age. Values are adjusted to 200 days and for dam age. This EBV is the best single estimate of an animal’s genetic merit for growth to early ages (ie. 8-10 months).

400-Day Weight: The 400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for dam age. This EBV is the best single estimate of an animal’s genetic merit for yearling weight.

600-Day Weight: The 600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for dam age. This EBV is the best single estimate of an animal’s genetic merit for growth beyond yearling age.

CARCASE

Eye Muscle Area: The EMA EBV (cm²) estimates genetic differences in eye muscle area at the 12/13th rib site of a 300kg dressed carcass. More positive EBVs indicate better muscling on animals.

Rib Fat: The Rib Fat EBV (mm) estimates the genetic differences in fat depth at the 12/13th rib in a 300kg dressed carcass. More positive EBVs indicate more subcutaneous fat and earlier maturity.

Rump Fat: The Rump Fat EBV (mm) estimates the genetic differences in fat depth at the P8 site of a 300kg dressed carcass. More positive EBVs indicate more subcutaneous fat and earlier maturity.

Intramuscular Fat Percent: The IMF% EBV (%) is an estimate of the genetic difference in the percentage of intra-muscular fat at the 12/13th rib site in a 300kg carcass. More positive EBVs indicate higher marbling.

BREED AVERAGE - To aid in your interpretation of the GROUP BREEDPLAN EBV’S in this catalogue please find below the Breed Average EBV’s for the 2023 drop calves.

CE DIR	CE DTRS	GL	BW	200	400	600	MCW	MILK	SS	DC	CWT	EMA	RIB	RUMP	RBY	IMF
+4.3	+5.0	-1.0	+3.7	+35	+59	+82	+67	+18	+2.3	-3.7	+56	+4.4	+0.9	+1.2	+0.9	+0.8

The Group Breedplan Estimated Breeding Values contained in this catalogue were supplied by the Agricultural Business Research Institute from data supplied by the breeders. Neither Herefords Australia Limited nor the ABRI oversee or audit the collection of this data. Log on to www.herefordsaustralia.com.au for a full description and explanation of all Breedplan, EBVs, Accuracies, Selection Indexes and Comparing Animals.

Australian Hereford Selection Indexes: Technical Specifications

Herefords Australia Ltd. currently reports two different selection indexes. These are the:

- Sustainability Production Index
- MSA Production Index

All of the selection indexes described above have been derived using [BreedObject](#) software. The BreedObject selection index development process involves four major steps. These steps are:

1. A detailed description of the input costs and value generation of the commercial herd and target production system.
2. Once the target production system is described, the BreedObject software evaluates how each trait influences profitability and the economic value of improving each trait.
3. The BreedObject software then assesses what emphasis needs to be applied to each Estimated Breeding Value (EBV) trait to achieve the maximum profitability in the production system and for the market end point for which that index was designed. This step includes evaluating the selection response expected from direct selection on the individual EBVs and the correlated responses expected from selection on related EBVs.
4. The importance placed on each EBV results in the selection index value that is calculated for each animal.

Each selection index describes a different production system/market scenario and relates to a typical commercial herd using Hereford bulls. As is the case for EBVs, each selection index can be used to rank and compare animals on their genetic merit. Producers are advised to use the selection index that most closely aligns to their production system. See the [Using Australian Hereford Selection Indexes](#) tip sheet, available in the [Help Centre](#) on the BREEDPLAN website, for further information on the identification and utilisation of the most applicable selection index for your herd.

All selection indexes are reported in units of net profitability per cow mated (\$) for the production system/market scenario they describe. Selection indexes account for both sides of the profit equation (costs as well as income), and also reflect the relative short and long term profit associated with possible selection decisions. For example, short term profit can be generated by a bull through the sale of his progeny, and the longer term profit generated by his daughters in a self-replacing cow herd.

BREEDPLAN results are calculated by the Agricultural Business Research Institute using beef genetic evaluation analytical software developed by AGBU and Meat & Livestock Australia Limited.

For more information visit breedplan.une.edu.au

These indexes take a balanced approach and apply selection pressure to all trait categories that impact on productivity, quality of product and cost of production. Importantly both indexes have a focus on sustainable beef production which is achieved through improving the efficiency of the production system, as well as improving eating quality. Significant premiums are applied for increasing marble score up to a marble score of 3. Pressure is also applied to early life growth to maintain low ossification scores and good MSA compliance.

In addition, each selection index targets the following specifications.

Sustainability Production Index - Estimates the genetic differences between animals in net profitability per cow joined in a commercial self-replacing Hereford herd targeting the domestic market and with a strong focus on sustainability. Daughters are retained for breeding, so maternal traits are of importance. Steers are finished on grass until 20 months of age to target 300 kg carcasses with 10 mm P8 fat depth.

MSA Production Index - Estimates the genetic differences between animals in net profitability per cow joined in a commercial self-replacing herd targeting higher MSA grades in the domestic market. Daughters are retained for breeding and so maternal traits are of importance. Steers are grain finished until 20 of age to target 340 kg carcasses with 12 mm P8 fat depth. A high cost is applied for cow feed costs during the annual feed shortage period which produces little change in mature cow weight.

More detailed information regarding each selection index is provided on the following pages.

If you have any further queries regarding the Australian Hereford Selection Indexes, please do not hesitate to contact staff at your BREEDPLAN processing centre.
