POLL HEREFORDS

EST. 1957

**15TH ANNUAL ON PROPERTY
BULL & SELECT FEMALE
SALE**

Friday 12th July 2024

Inspections - 10am • Sale Starts - 1pm

• 32 Bulls

• 15 Registered Heifers

**Inspection welcome
anytime by appointment**

Jeff, Robyn and Anna Holcombe

“Kombali”

640 Kaputar Road, Narrabri NSW 2390

Jeff: 0427 285 226 • Robyn: 0428 285 226 • Anna: 0429 694 435

Email: rayleigh8@bigpond.com • www.rayleighpollherefords.com.au

Selling Agent: Bruce Evans - Nutrien Phone: 0428 921 599

Stud Stock Agent: John Settree - Nutrien Phone: 0408 297 368

SALE INFORMATION

The Sale venue is located at “Kombali” 640 Kaputar Road Narrabri NSW 2390, which is approximately 7km from the centre of Narrabri.

- All cattle will be available for inspection from 10am on Sale Day, with the auction to commence at 1pm sharp. Prior inspection can be arranged by contacting the vendor or selling agents.
- The Sale will be conducted using the open cry auction system, with an online bidding option available through Auctions Plus. Cattle will be presented for auction via video.
- GST is to be added onto the purchase price at the fall of the auctioneer’s hammer. You will be invoiced purchase price plus GST.
- Rebate of 2% will be offered to outside Agents introducing buyers in writing 24 hours prior to the Sale and attending the sale with the client.
- Free delivery is available up to 200kms. Delivery can be given at the completion of the sale and transport will be available on the day for those wishing to co-ordinate delivery.
- All care will be taken with the wellbeing of animals prior to delivery. However should unforeseen injury or illness occur, no responsibility will be accepted by the vendor. Insurance is recommended.
- A Buyer’s Instruction Slip must be completed by the Purchaser or representative and handed to the Auctioneer prior to leaving the sale. No verbal instructions will be accepted.
- There is no vendor insurance on sale animals. It will be the responsibility of the buyer to insure their purchases. Insurance representatives will be in attendance on sale day.
- All bulls have been 7 in 1, Pestiguard and Vibrio vaccinated and treated with Dectomax injectable.
- All bulls have been semen, morphology and soundness tested by Narrabri Veterinary Clinic, Certificates are available on request.
- Visitors enter the cattle pens at their own risk. Children and prams must not enter the yards.
- All bulls have been DNA and SNIP tested for this year’s sale. Should any additional testing be required, this will be completed upon request.
- We welcome any feedback as to how your bull is performing. This strengthens our future breeding program and ensures we continue to produce cattle suited to your needs.
- Should there be any issues with your purchases, we would like to be the first to know. All bulls come with a guarantee to naturally breed. If your bull fails to naturally breed within the first 6 month, a replacement bull or a credit (less salvage value) can be arranged. This excludes loss due to injury or illness sustained post sale day. Please contact us to discuss any issues and provide a veterinary certificate.
- Accommodation can be arranged by contacting the selling agents.
- Food and refreshments to be served on Sale Day.
- Rayleigh Poll Herefords have a Biosecurity plan with a JBAS – 7.

Disclaimer

Whilst all due care and attention has been paid to the accuracy in the compilation of this catalogue, neither the vendor nor selling agents or representatives therefore assume any responsibility whatsoever for the correctness, use or interpretation of the information on animals included in this catalogue. Potential buyers are advised to inspect animals prior to sale.

OUR BREEDING OPERATION

Rayleigh Poll Hereford Stud was established in 1957. Now with 67 years of experience in the industry, we strive to produce lines of cattle that are renowned for their performance, reliability and predictability.

The aim of the Stud has always been to breed functional and efficient cattle, noted for their ability to fatten on pasture and carry themselves through tough times. Structural soundness, doing ability and natural muscling are at the forefront of our program to ensure this vision is met. Maintaining productivity and fertility in dry times are further attributes integral in our program. Our bulls are adaptable, low fuss, ready to work and backed by data.

THIS YEAR'S SALE DRAFT

ALL SALE ANIMALS HAVE BEEN:

- ◆ Vaccinated for Pesti virus
- ◆ Vaccinated for Vibrio virus
- ◆ Vaccinated with 7 in 1
- ◆ Wormed (Dectomax Injectable)

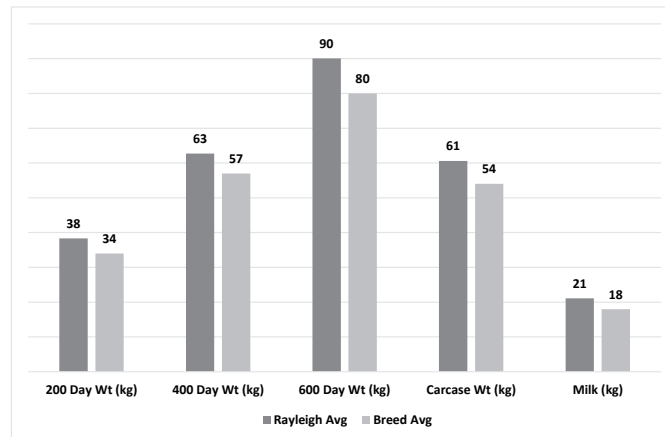

Table 1: Growth, carcass weight and milk.

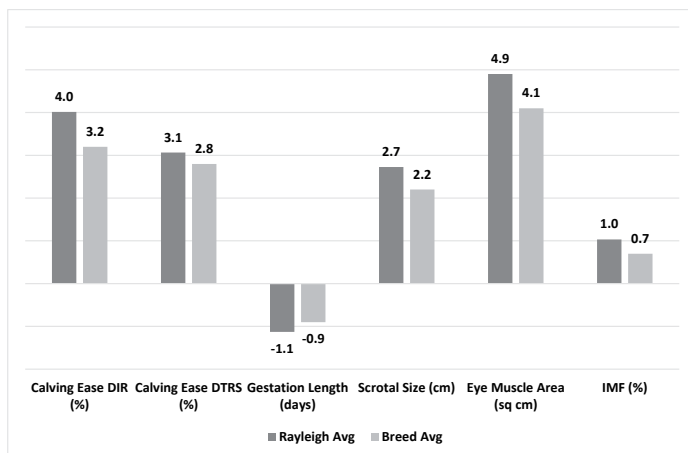

Table 2: Fertility and carcass quality indicators.

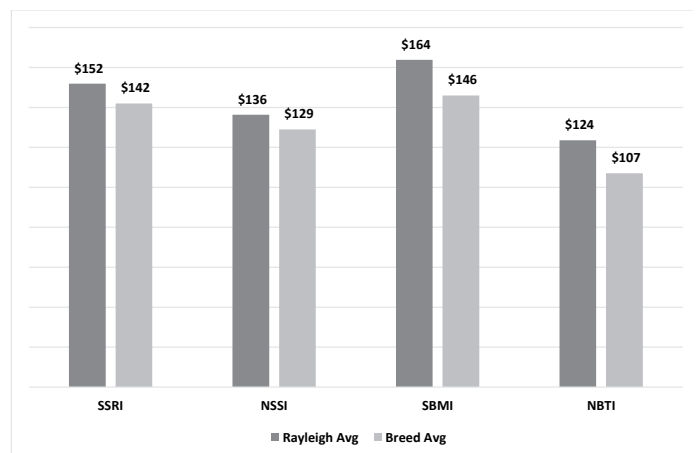

Table 3: Index values.

BREEDPLAN MADE EASY

Breedplan is a performance evaluation program that compares bulls “on a level playing field” for a number of important commercial traits.

The difference between a bull’s genetics and the breed benchmark for a range of traits is reported as an **Estimated Breeding Value (EBV)** - an estimate of how a bull will perform as a parent rather than how he looks on the day.

EBVs can be positive (+) or negative (-), ie, above or below the breed benchmark of zero.

EBVs are calculated from the available performance information on the animal, its parents, progeny and its close relatives within the breed.

The information is adjusted for age, dam age, and for differences between herds, years, season of calving, management effects and for mating and selection biases. The heritability of the trait is also taken into account.

EBVs - what do they tell me about a bull

BIRTH

Birth Weight: The Birth Weight EBV (kg) is based on the measured birth weight of animals, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

FERTILITY

Scrotal Size: The Scrotal Size EBV (cm) is an indicator of male fertility. Higher (positive) EBVs indicate higher fertility. Higher SS EBVs are also positively associated with female fertility through earlier age of puberty.

GROWTH

Milk: 200-Day Milk EBV (kg) is an estimate of the contribution that a dam makes to the 200 day weight of her progeny. For sires, this is an indication of the contribution that his daughters will make to the 200 day weight of their calves.

200-Day Growth: The 200-Day EBV (kg) is calculated from the weight of animals taken between 80 and 300 days of age. Values are adjusted to 200 days and for dam age. This EBV is the best single estimate of an animal’s genetic merit for growth to early ages (ie. 8-10 months).

400-Day Weight: The 400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for dam age. This EBV is the best single estimate of an animal’s genetic merit for yearling weight.

600-Day Weight: The 600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for dam age. This EBV is the best single estimate of an animal’s genetic merit for growth beyond yearling age.

CARCASE

Eye Muscle Area: The EMA EBV (cm²) estimates genetic differences in eye muscle area at the 12/13th rib site of a 300kg dressed carcass. More positive EBVs indicate better muscling on animals.

Rib Fat: The Rib Fat EBV (mm) estimates the genetic differences in fat depth at the 12/13th rib in a 300kg dressed carcass. More positive EBVs indicate more subcutaneous fat and earlier maturity.

Rump Fat: The Rump Fat EBV (mm) estimates the genetic differences in fat depth at the P8 site of a 300kg dressed carcass. More positive EBVs indicate more subcutaneous fat and earlier maturity.

Intramuscular Fat Percent: The IMF% EBV (%) is an estimate of the genetic difference in the percentage of intra-muscular fat at the 12/13th rib site in a 300kg carcass. More positive EBVs indicate higher marbling.

BREED AVERAGE - To aid in your interpretation of the GROUP BREEDPLAN EBV’S in this catalogue please find below the Breed Average EBV’s for the 2022 drop calves.

CE DIR	CE DTRS	GL	BW	200	400	600	MCW	MILK	SS	DC	CWT	EMA	RIB	RUMP	RBY	IMF

HEREFORDS
Australia

AUSTRALIAN HEREFORD SELECTION INDEXES

THERE ARE CURRENTLY FOUR DIFFERENT SELECTION INDEXES CALCULATED FOR AUSTRALIAN HEREFORD ANIMALS. THESE ARE:

- SOUTHERN SELF-REPLACING INDEX
- SOUTHERN BALDY MATERNAL INDEX
- NORTHERN SELF-REPLACING INDEX
- NORTHERN BALDY TERMINAL INDEX

Each selection index describes a different production/market scenario and relates to a typical commercial herd using Hereford bulls. Producers are advised to use the selection index that most closely aligns to their production system. All four selection indexes are focussed on maintaining and improving eating quality. Significant premiums are applied for increasing marble score up to a marble score of 3. Pressure is also applied to early life growth to maintain low ossification scores and good MSA compliance. In addition, each selection index targets the following specifications.

SOUTHERN SELF-REPLACING INDEX

Estimates the genetic differences between animals in net profitability per cow joined in a commercial self-replacing straight bred Hereford herd targeting the domestic market. Daughters are retained for breeding and so maternal traits are of importance. Steers are slaughtered at 20 to 22 months of age to produce 300 kg carcasses with 10 mm P8 fat depth. A moderate cost is applied for cow feed costs during the annual feed shortage period.

NORTHERN SELF-REPLACING INDEX

Estimates the genetic differences between animals in net profitability per cow joined in a commercial self-replacing herd targeting the domestic market. This index is suitable for use by both straight bred Hereford herds and in crossbreeding programs where Hereford bulls are being used over a *Bos indicus* based cow herd (e.g. flatback). Daughters are retained for breeding and so maternal traits are of importance. Steers are slaughtered at 20 to 22 months of age to produce 340 kg carcasses with 12 mm P8 fat depth. A high cost is applied for cow feed costs during the annual feed shortage period.

SOUTHERN BALDY MATERNAL INDEX

Estimates the genetic differences between animals in net profitability per cow joined in a commercial crossbred herd using Hereford bulls over *Bos taurus* females (e.g. Angus). A portion of the heifers are retained for breeding and so maternal traits are of importance. The steers and surplus heifers are destined for slaughter at 20 to 22 months of age. Steers produce 300 kg carcasses with 10 mm of P8 fat depth, while heifers produce 270 kg carcasses with 12 mm of P8 fat depth. A moderate cost is applied for cow feed costs during the annual feed shortage period.

NORTHERN BALDY TERMINAL INDEX

Estimates the genetic differences between animals in net profitability per cow joined in a commercial crossbred herd (e.g. flatback) using Hereford bulls over *Bos indicus/Tropical* females (e.g. Santa Gertrudis) where all progeny (male and female) are destined for slaughter. Steers and heifers are slaughtered at 20 to 22 months of age. Steers produce 340 kg carcasses with 14 mm of P8 fat depth while heifers produce 300 kg carcasses with 17 mm of P8 fat depth.

All selection index values have been derived using BreedObject technology. More detailed information regarding each selection index is provided on the following pages.

If you have any further queries regarding Hereford Selection Indexes, please do not hesitate to contact staff at Herefords Australia or your BREEDPLAN processing centre.

AuctionsPlus

How to Register and Bid on AuctionsPlus

1

Go to www.auctionsplus.com.au to register at least 48 hours before the sale.

2

Select **"Sign Up"** in the top right hand corner.

3

Fill out your name, mobile number, email address and create a password.

4

Go to your emails and confirm the account.

5

Return to AuctionsPlus and log in.

6

Select **"Dashboard"** and then select **"Request Approval to Buy"**.

7

Fill in buyer details and once completed go back to Dashboard.

8

Complete buyer induction module (approx. 30 minutes).

9

AuctionsPlus will email you to let you know that your account has been approved.

10

Log in on sale day and connect to auction.

11

Bid using the two-step process – unlock the bid button and bid at that price.

12

If you are successful, the selling agent will contact you post sale to organise delivery and payment.

For more information please contact us on:

Phone: (02) 9262 4222

Traits Observed: CE,BWT,200WT,400WT,600WT,SS,FAT,EMA,IMF,Genomics

Notes: Kicking off this year's sale with a modern, industry relevant sire. This is a bull with phenomenal carcass and red meat. A well balanced bull with a strong topline, thickness and depth right through. A standout since birth and out of one of our best cows. Maternal brother is Rayleigh Republican R92 whom we share in partnership with Kidman Poll Herefords.
