

RAYLEIGH COMPLETE FEMALE DISPERSAL SUPPLEMENTARY INFORMATION

Important note on PREG TESTING results:

Sires were removed by the 11th of September, Preg testing was completed 15th September. Our vet can only detect pregnancies greater than 6 weeks gestation, so cows that conceived in the last ~6 weeks of joining will register as NDP. **Not Detectably Pregnant (NDP) means that cow was not detectable on the day of scanning, not necessarily that cow is empty.**

To accommodate this sale, our joining was **moved forward ~4 weeks**, later calvers had reduced cycles with bulls in for this joining.

We recommend retesting NDP cows after the 27th October.

COWS

LOT #	Cow ID	Calf ID	Preg test result (15/09)	Calf Sex	Calf Sire Verification	Calf Dam Verification	Calf Poll Test	Notes:
Lot 1	AHCS002	AHCW037	PTIC	Male	IHSN276		HPc	Calf: Scurred.
